

Transition Worcester Land Share

Do you have a big garden that is going to waste?
Is your garden underused?

Transition Worcester

Join the Land Share scheme

Transition Worcester, through the National Land Share scheme, is seeking to connect people who want to grow their own food to space where they can grow it. There is a whole community out there who can help you get your ideal garden. Call Rod on 01905 425596 if you want some help.

The Benefits

Growers will get the opportunity to cultivate a piece of land without having to spend years on a waiting list for an allotment.

The garden owners will have the pleasure of seeing a lovely developing vegetable plot instead of a scruffy garden, receive a share of the produce, and feel a sense of community in being part of a sharing initiative.

Everyone gets fresh, tasty home-grown vegetables from a trusted source, and an opportunity to cut your 'food miles' and carbon footprint.
